PART D: Derivative Classification Decisions Derivative classification is the incorporating, paraphrasing, restating, or generating in new form information that is already classified. This includes classification based on classification guides or other source documents. (Provide information on all classification decisions, regardless of the media, including those documented and disseminated via email. Do not count reproductions or copies.)	
19. Enter the number of derivative TOP SECRET classification decisions made during the reporting period.	19. 96,448
20. Enter the number of derivative SECRET classification decisions made during the reporting period.	20. 72,400
21. Enter the number of derivative CONFIDENTIAL classification decisions made during the reporting period.	21. 8,595
22. Total number of derivative classification decisions. (Sum of blocks 19, 20, and 21)	22. 177,443
PART E: Mandatory Declassification Review Requests A "Request" is an individual initial review request, regardless of the number of documents or pages to be reviewed as part of the request. Report only requests for your agency in which your agency is responsible for the final decision.	
23. Enter the number of REQUESTS received during the reporting period.	23. 7
24. Enter the number of REQUESTS closed during the reporting period.	24. 22
25. Of the REQUESTS entered into block 24, enter the number of pages that were:	25.
a. Declassified in full .	25a. 151
b. Declassified in part .	25b. 0
c. Denied declassification.	25c. 6
d. Total number of requested pages acted on. (Sum of blocks a, b, and c)	25d. 157
26. Enter the number of REQUESTS that have been unresolved for over one year.	26. 12
27. Enter the AVERAGE NUMBER OF DAYS to resolve each request.	27. 120
28. Enter the number of REFERRED REQUESTS received during the reporting period. (Number of requests referred to your agency from another agency)	28. 3
PART F: Mandatory Declassification Review Appeals An "Appeal" is an individual request for appeal, regardless of the number of documents or pages to be reviewed as part of the request. Report only appeals for your agency in which your agency is responsible for the final decision.	
29. Enter the number of APPEALS received during the reporting period.	29. 0
30. Enter the number of APPEALS closed during the reporting period.	30. 0
31. Of the APPEALS entered into block 30, enter the number of pages that were:	31.
a. Declassified in full .	31a. 0
b. Declassified in part .	31b. 0
c. Denied declassification.	31c. 0
d. Total number of appealed pages acted on. (Sum of blocks a, b, and c)	31d. 0
32. Enter the number of APPEALS that have been unresolved for over one year.	32. 0

PART J: Explanatory Comments

Use this space to elaborate on any section of this form. If more space is needed, provide as an attachment to this form. Provide explanations for any significant changes in trends/numbers from the previous year's report.

Part C 13: Process used to determine Office of Intelligence and Analysis (OIA) original classification decisions in FY 2017:

- Recorded the results of the 2017 Fundamental Classification Guide Review, where one original classification was made.
- Tasked the Senior Advisor of each OIA OCA with guidance on information needed and recorded their responses.

Part D 19-22: Terrorism and Financial Intelligence (TFI) increase in derivative classification over FY 2016 is driven primarily by

(b) (7)(E)

(b) (7)(E) OFAC sanctions authorities were expanded by recent legislation, including CAATSA, as well as (b) (7)(E)

(b) (7)(E)

However, (b) (7)(E) all saw

increases their derivative classification at all levels due to expanded mission requirements. Comparison to OIA FY 2016 Results - Derivative classification decisions made by OIA increased by 36,629 compared to FY 2016. While this is represented by an increase in all three classifications, the greatest contribution to this comes from a 37,200 increase in derivative classification decisions at the Top Secret level. This is attributed to three respondents that reported a significantly higher number of Top Secret derivative classification decisions compared to other respondents. Each of these individuals was interviewed to determine what may have caused the increase in Top Secret derivative classification decisions. It was found that these respondents were from A&P where there is regular exchange of information with other IC entities and daily duties involve the development of counter-terrorism (CT) reports. Compared to FY 2016, OIA respondents noted (b) (7)(E)

(b) (7)(E)

There has also been an increase in reports received by OIA A&P from outside IC elements, which are increasingly being developed at the Top Secret level, leading to greater information exchanges with these organizations at that level, as well as the output of CT reports at the Top Secret level. This appears to be the greatest contributor to the increase in Top Secret derivative classification decisions. Other possible contributing factors were explored, such as, number of employees surveyed from A&P during the previous year and whether information was counted correctly, but these factors did not appear to cause the change from FY 2016. Derivative classification decisions at the Secret and Confidential levels also increased in comparison to FY 2016, but not significantly. While over-classification cannot be ruled out as a contributor to the sharp increase in Top Secret derivative classification decisions, most of OIA's information, particularly that of A&P, is derivatively classified from source materials received from inter-agency partners. This is the main driver for the classification level of A&P's products.

Part E-25c: The MDR pre-emptively requested information deemed classified during a previously submitted but not completed FOIA request. OFAC could not initiate MDR until completed FOIA.

Part I: Process used to determine number of original ORCON/ORCON-USGOV decisions by OIA:

- Solicited information from the Office of Analysis and Production (A&P), which produces analytic products, and the Office of Information Sharing, which processes requests for expanded dissemination of ORCON, who concluded that based on the definition of a DAP, as described in ICD 206. Note - OIA did not develop any DAPs that were originally marked ORCON or ORCON-USGOV during FY 2017.
